TECHNICAL SKILLS

Programming languages

Java, C#, F#, Delphi, Android (Java), Unity (C#)

Integrated Development Environments (IDEs):

IntelliJ IDEA, Android Studio, Visual Studio
RStudio, Embarcadero RAD Studio, Unity

Data Analysis/Engineering

R, MATLAB

Productivity Tools

Microsoft Word, Excel, PowerPoint and
Visio

Databases

Microsoft Access, SQL Server

Version Control

Git, GitHub

EDUCATION

BSc (Hons) Computer Science & Information Systems

Nelson Mandela University | Gqeberha, South Africa
2025

BSc Computer Science and Statistics

Nelson Mandela University | Gqeberha, South Africa
2022-2024

National Senior Certificate

Pinelands High School | Cape Town, South Africa
2017-2021

Achievements

- Awarded Information Technology Subject Award (2019, 2020)
- Awarded Merit Colours for Academic Achievement (2020)

LEADERSHIP ROLES

Custodian, Pinelands High School (2019)

- Assisted with detention duties.

PROFILE

BSc (Hons) Computer Science & Information Systems graduate from Nelson Mandela University with hands-on experience in software development, application testing, and technical support through academic projects and lab assistance. Skilled in Java, C#, F#, Android, Unity, Delphi, and web technologies, with practical exposure to Agile workflows, debugging, and problem-solving. Adaptable, detail-oriented, and eager to contribute to innovative, reliable software solutions while growing as a professional developer.

WORK EXPERIENCE

Lab assistant

Nelson Mandela University

Feb 2024 - Jun 2024

- Assessed programming practicals for 2nd-year students in the Data Structures and Algorithms module.

Technical Lead (3rd-Year Projects)

Nelson Mandela University

Apr 2025 - Oct 2025

- Guided 3rd-year Computer Science students through project planning, design, and development.

Projects

Souls – Donation Management Web Application (HTML, CSS, JavaScript)

Collaborative Third-Year Project

- Developed a platform connecting Helpers (donors) with Souls (recipients) via non-profits.
- Built user management for Helpers and Admin users with role-based access.
- Designed compatibility forms and dynamic interfaces for donations, budget management, and profile updates.
- Technologies: HTML, CSS, JavaScript, responsive design.

Netball Performance Analysis Mobile Application (Android, Supabase)

Honours Project – 2025

- Developed an Android app for real-time netball match statistics and player performance tracking.
- Implemented secure authentication and cloud storage using Supabase (PostgreSQL, REST APIs).
- Designed a coach (admin) interface for managing players, matches, and in-game actions.
- Built using Android Studio, Java, Supabase, Git, following Design Science Research.

CERTIFICATIONS

- Microsoft – AI Skills Fest 2026 (2026)
- Coursera – Google AI Essentials (2026)
- DataCamp – AI for Software Engineering (2026)
- DataCamp – Working with the OpenAI API (2026)
- DataCamp – Introduction to GitHub Concepts (2026)
- DataCamp – Introduction to Power BI (2026)
